

Emergency Procedures Training

One Day Pilot Program plus Inflight Medical

Emergency Procedures plus Inflight Medical Training For Pilots

The Aircare FACTS® Pilot Program + Inflight Medical training day combines classroom instruction with extensive hands-on equipment experience in Aviation Firefighting, Hypoxia Awareness, Emergency Land & Water Ditching/ Evacuation Training and Inflight Illness & Injury. The course is instructed with a flight-deck perspective and an emphasis on human factors, communication, and leadership during emergency situations.

Successful completion of the course helps flight departments fulfill specific training requirements for FAA, EASA, EU-OPS, IS-BAO compliance, and OSHA Bloodborne pathogen requirements with the benefit of realistic and applicable training devices and instruction.

One Day Program Includes: (all modules include online precourse training.)
